Storage, Once For Ever.

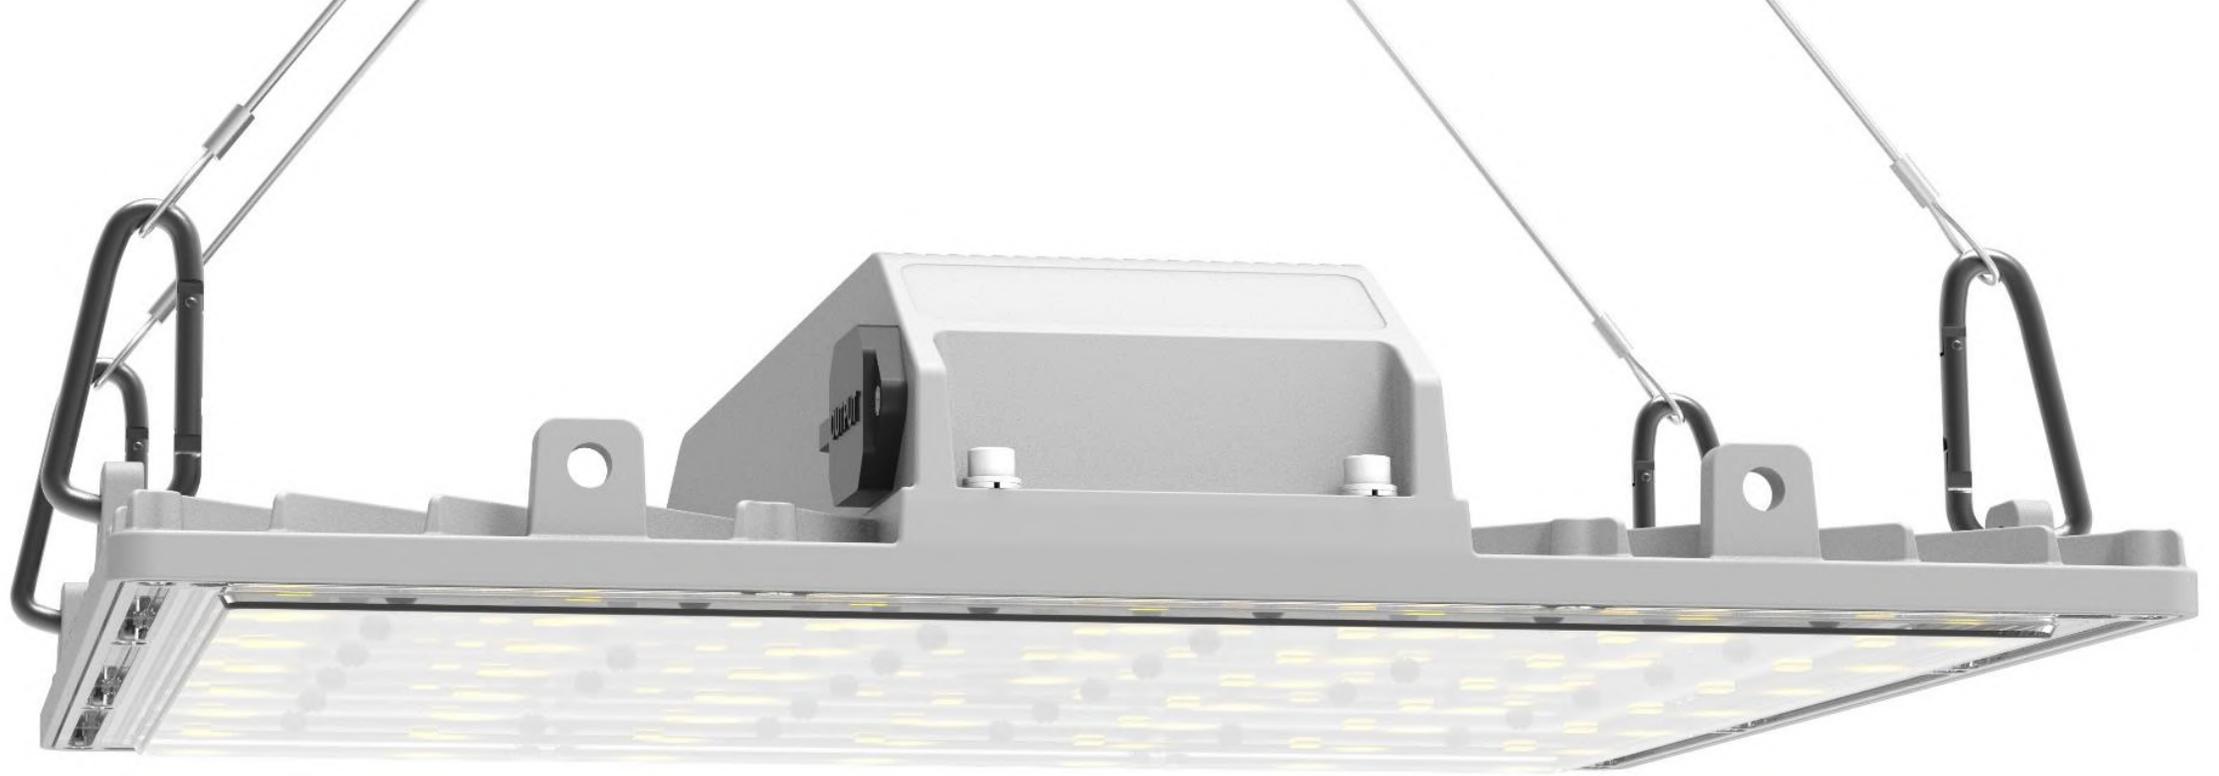

Preset your special light recipes for the plants, Storage for the next use. Storage function gives you a simple, quick way for your next plant. Ultra Plant will remember all the detailed settings and you don't have to.

Programmed, Grow by itself.

When you have a clear plan on steps to grow, insert them into Ultra Plant, and it will automatically follow the steps you already program to take care of your plants as your smart assistant.

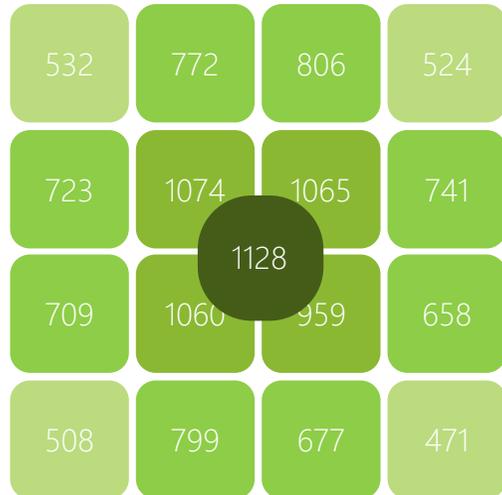

**Look After Your Plants
in Any Angle, Height, Position.**

20% Higher in PPFD
in the same height

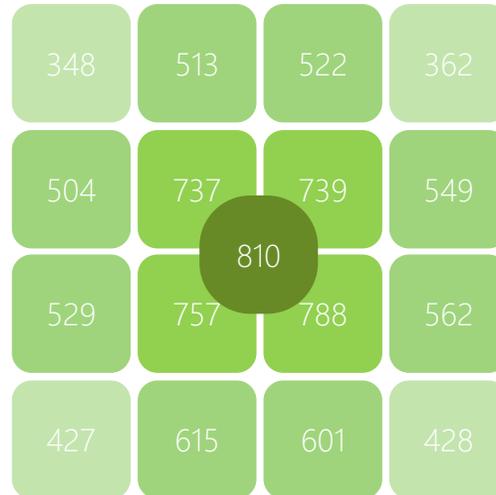

90% Fewer LED Chips
at the same size

AVE PPFD 777

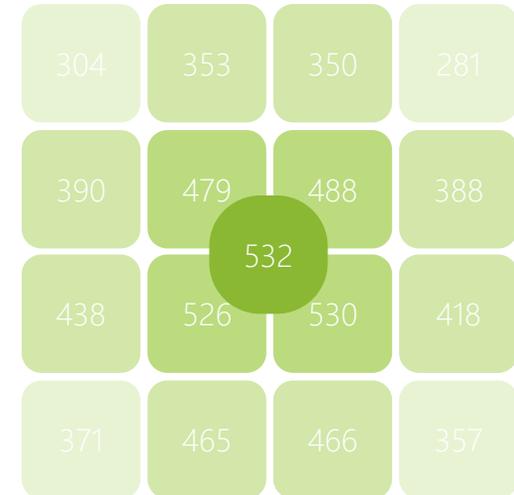

150W 2.13 μ mol/J
Height=30cm/12"

AVE PPFD 576

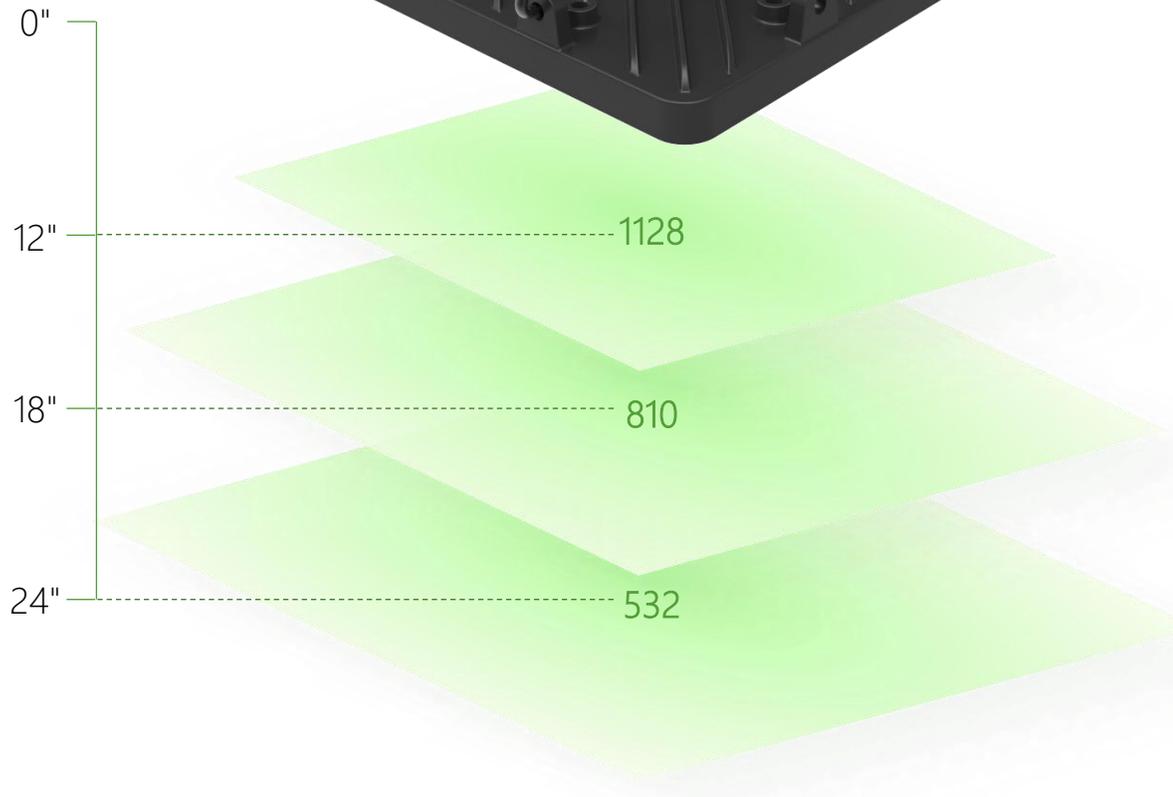

150W 2.13 μ mol/J
Height=45cm/18"

AVE PPFD 420

150W 2.13 μ mol/J
Height=60cm/24"

Still Outstands

in higher planting heights

In short planting heights, Ultra Plant is able to show a competitive PPFD figure.

Different from others LED grow lights, when heights go higher, Ultra Plant still outperforms than those in center and average PPFD.

Create light recipes on your own.

Create your light recipes for different plants specialized in sprouting, seedling, blooming and fruiting period.

Take light recipes from presets.

Ultra Plant also presets professional light recipes for those who may not have much experience in planting.

No matter who you are,
No matter what you grow,

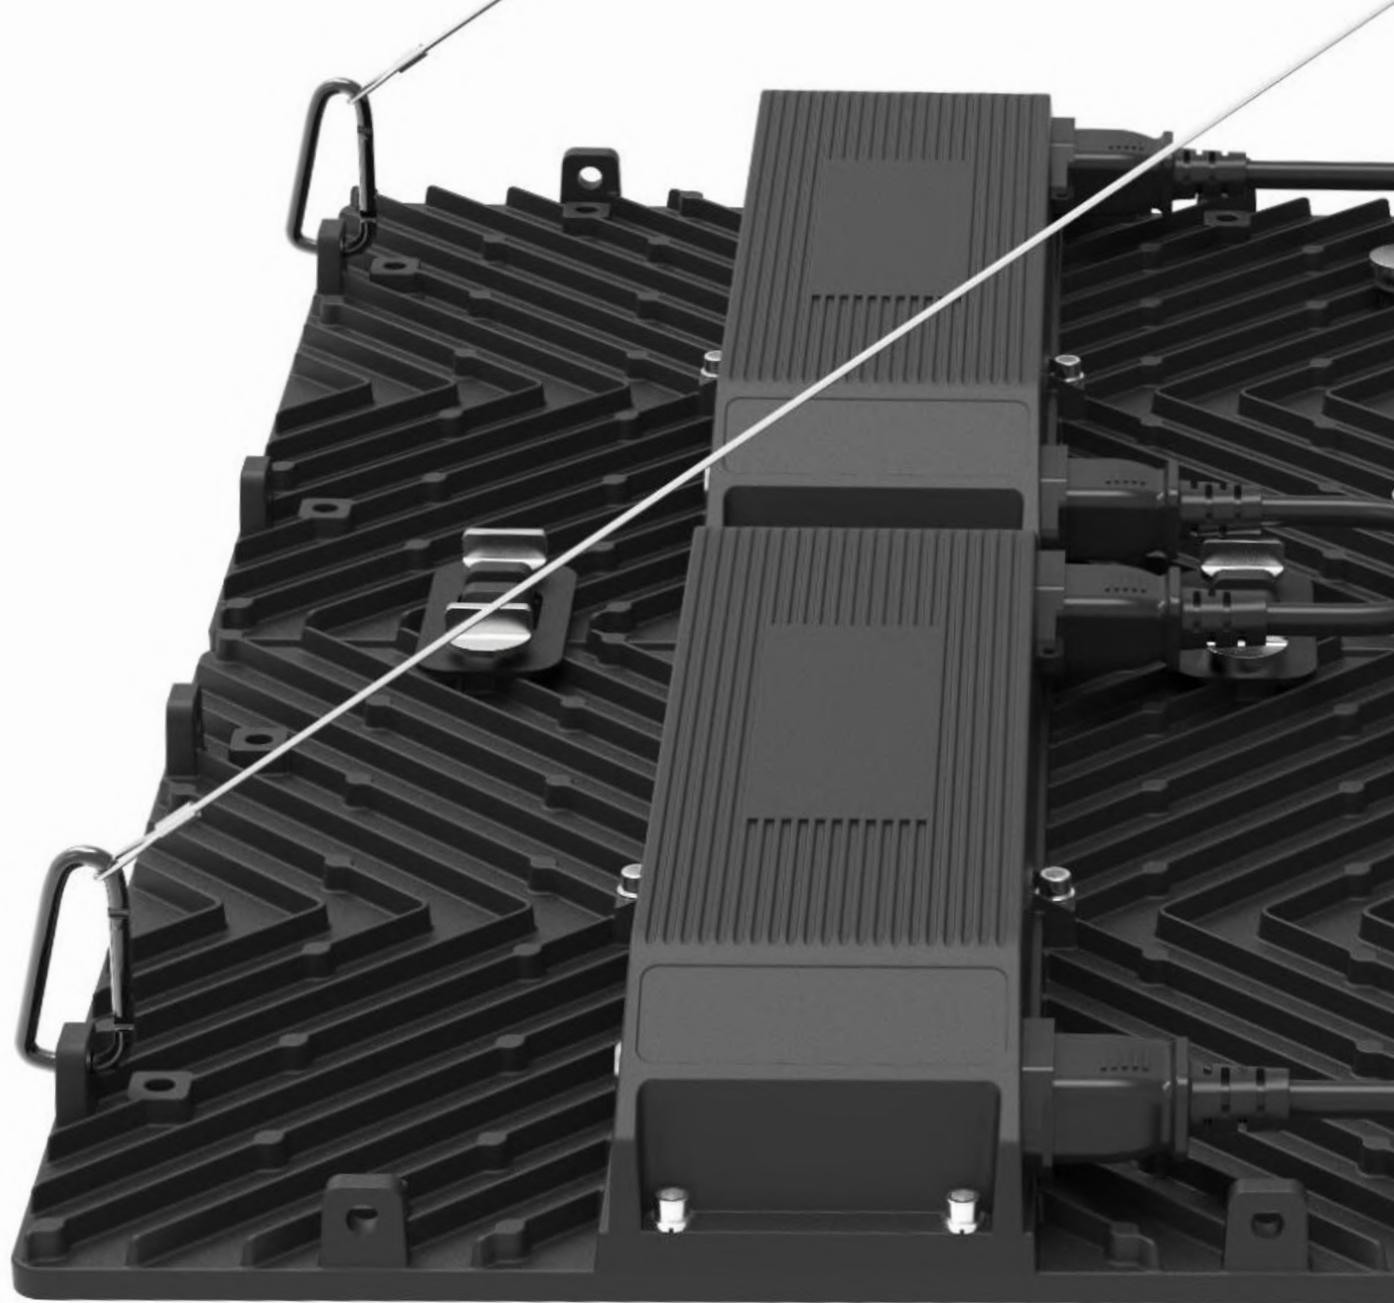

**Help your growing
Easier, Smarter, Better
All the time.**

Optimized Cooling Design

More Stable,
Much Lower,

than competitors in working temperature

Selected Shield,

Pervious to Light,
IP65 for Water, Dust.
